

# HEAVY VEHICLE LUBRICATION SOLUTIONS

Lower maintenance, longer mileage

Tecsia Lubricants offers high-performance lubricants that provide vital benefits to enhance your truck reliability: extended relubrication and maintenance intervals, longer service life of components, more road worthiness and reduction of operating costs, and unscheduled downtimes compared with conventional products.

## Critical Points of Lubrication

### 1 Wheel Hub

#### Roller Bearings and Shaft TACBECON® SG 500

Excellent lubrication film for smooth transportation and reduce energy consumption. Heavy and shock loading capacity. Prevent fretting and galling. Resistance to corrosion and rust.

### 2 Fifth Wheel Coupling

#### Fifth Wheel Plate and Pivot TACBECON® SG 800/2

Heavy duty grease protect applications for long periods of time. High adhesiveness which prevents fling off or dripping. Excellent water washout resistance. Acts as a sealant for keeping out contamination such as dust and water.

### 3 Central Lubrication

#### Auto Greasing System TACBECON® SG 500

Formulated for all types of truck applications including kingpins, slack adjuster, cross shaft, cam shafts, etc. Resistance to corrosion and rust.

### 4 Bolts and Nuts

#### Threaded Lubrication

TACBECON® S1100  
Copper anti-seize paste with lead-free formulation offers protection from galling and seizure at high temperature.

### 5 Refrigeration Compressor

#### Air Conditioning System

XAERUS XR 212-68  
A wax-free high performance refrigeration compressor oil that offers excellent stability and prevents solid formation in the evaporator and expansion valves.
